

KENDRIYA VIDYALAYA SABARMATI, AHMEDABAD

HOLIDAY HOMEWORK FOR CLASS – IV

English

1. JUDGE A BOOK BY ITS COVER

Say farewell to the notebook cover that looks like everyone else's. Get innovative and design your own notebook cover. Cover your English notebook with a bright red fluorescent sheet. Write any one suitable proverb, idiom or quotation on 'The Importance of Reading'.

2. WATCH THE FOLLOWING ENGLISH MOVIES-

- a) Charlotte's web
- b) Finding Nemo
- c) Smurf 2

Prepare a character sketch of your favourite character using at least 10 describing words on an A4 size sheet.

3. VOCABULARY TREE

Make 4 vocabulary tree on an A4 size sheet. choose any word and write any five synonyms of that word on that tree. (try to make your tree innovative and creative with your brilliant ideas)

Below is an example, now it's time to create yours.

4. Read the passage and answer the following questions:

Achoo!

(by Cynthia Sherwood)

Achoo! We all sneeze sometimes. Sneezing is a reflex that your body does automatically. That means you cannot make yourself sneeze or stop one once it has started. When you sneeze, your body is trying to get rid of bad things in your nose, such as bacteria. You have extra germs when you have a cold, so you sneeze a lot more. You might also sneeze when you smell pepper! Inside your nose, there are hundreds of tiny hairs. These hairs filter the air you breathe. Sometimes dust and pollen find their way through these hairs and bother your nasal passages. The nerves in the lining of your nose tell your brain that something is invading your body. Your brain, lungs, nose, mouth, and the muscles of your upper body work together to blow away the invaders with a sneeze. When you sneeze, germs from your nose get blown into the air. Using a tissue or “sneezing into your sleeve” captures most of these germs. It is very important to wash your hands after you sneeze into them, especially during cold and flu season. Do you ever sneeze when you walk into bright sunlight? About 25% of people

experience this phenomenon. Scientists believe that the brain gets confused when signals

from the optic nerve trigger the sneezing reflex in direct sunlight.

This usually runs in families.

If someone nearby sneezes, remember to tell them “Gesundheit!”

That is a funny

looking word which is pronounced “gezz-oont-hite.” It is the German word that wishes

someone good health after sneezing.

a) Which parts of your body work together when you sneeze?

b) Match each vocabulary word from the reading passage with the correct definition.

1. Filter

a. done unconsciously or spontaneously

2. invaders

b. relating to the nose

3. phenomenon

c. a nerve that sense

messages between the eye and the brain
